### Explaining electric charges

We charge for the electric you use in kilowatt hours (kWh). 1 kilowatt is equal to 1,000 watts.

If you use a standard LCD TV which uses ~150 watts while operating, it would take 7 hours of use to equal 1 kWh.

### Price to compare

If you want to consider getting your electric supply from another supplier, compare their price with ours. This month, your cost for energy supply is \$160.83 (or an average of 0.149055 per kWh). This *price to compare* varies month to month, depending on your usage.

**Your PoD ID is: PE00001200030004000** – Your PoD ID is your Point of Delivery identification within PSE&G's system. You will need this number if you are considering enrolling with another supplier.

“Total Credit” is the amount of community solar credits generated by your share of the solar farm for that specific production period, priced at the full retail value.

The “Subscriber Fee” is not an actual fee. It reflects what you owe for the solar credits after your 20.01% discount has been applied. In this case, the savings is \$7.14 (“Total Community Solar Credit”).

### Your Community Solar

Each month you are billed for your monthly usage, and you receive a kWh allocation based on your subscription percentage and the solar facility's monthly generation.

Your monthly allocation is limited to your monthly usage amount. Any credit in excess of your usage will be carried over to a future month's bill.

Annually, kWh not applied to prior bills will be credited at the avoided cost of power.

Please contact your supplier, SS NJ Solar, LLC 6th Floor, at 888-606-0054 for inquiries.
